Tiago Freitas dos Santos Tavares

AI Developer | AI Engineer — Google Cloud Certified

Phone: +55 (13) 99165-5339 • **Email:** tiagofreitastavares@gmail.com • **LinkedIn:** linkedin.com/in/tiagofreitastavares • **GitHub:** github.com/TiagoTavares05

PROFESSIONAL SUMMARY

Google Cloud Certified (**Generative AI Leader**) AI Developer with hands-on experience designing, building, and orchestrating autonomous Artificial Intelligence agents in **Python** on **Google Cloud Platform (GCP)**. Specialized in enterprise agentic solutions using **Google ADK (Agent Development Kit)**, **Google Cloud Agent Platform**, and **Gemini Enterprise (Agentspace)**, developing custom **MCP (Model Context Protocol)** servers, **RAG** pipelines, **REST API & SQL (BigQuery)** integrations, and serverless deployments (**Cloud Run, Cloud Scheduler**). Proven track record in building responsive web interfaces with **TypeScript, HTML, and CSS**, combined with advanced English communication skills.

PROFESSIONAL EXPERIENCE

AI Developer (AI Engineer) — **Gentrop** **04/2026 – Present**

- Architect, develop, and orchestrate autonomous AI agents and multi-agent systems in **Python** using **Google ADK (Agent Development Kit)**, **Google Cloud Agent Platform**, and **Gemini Enterprise (Agentspace)**.
- Build custom **MCP (Model Context Protocol)** servers and specialized tools to connect AI agents with **REST APIs**, **SQL / BigQuery** databases, and enterprise platforms, significantly reducing manual operational effort.
- Implement **RAG (Retrieval-Augmented Generation)** workflows and advanced **Prompt Engineering** strategies to deliver grounded, context-aware automation across critical business processes.
- Deploy, schedule, and manage production AI services on **Google Cloud Platform (Cloud Run, Cloud Scheduler, and Secret Manager)**, ensuring scalability and secure credential management.
- Develop tailored web interfaces using **TypeScript, HTML, and CSS** to streamline user interaction with AI agents and internal platforms.

AI Development Intern — **Gentrop** **04/2025 – 04/2026**

- Developed and automated foundational Artificial Intelligence agents in **Python** on **Google Cloud Platform (ADK and Gemini Enterprise)**, earning promotion to full-time AI Developer.
- Integrated cross-platform services via **REST APIs** and **SQL** queries, eliminating repetitive manual tasks and improving operational efficiency.
- Built and styled customized web interfaces using **HTML, CSS, and TypeScript**, enhancing usability across internal and client-facing applications.

Educational Technology Intern (Robotics & Programming) — **Maple Bear Canadian School** **07/2024 – 03/2025**

- Taught hands-on Programming, Robotics, and LEGO Education classes to students across different age groups, fostering computational thinking and problem-solving skills.
- Communicated daily in **English within an immersive bilingual environment** with students and faculty, planning and executing interactive learning activities.

Robotics and Programming Intern — **Logic Minds** **01/2024 – 06/2024**

- Designed and structured didactic materials and practical coding projects for programming logic and robotics lessons.
- Assisted instructors in the classroom across multiple education levels, strengthening technical communication and mentoring skills.

GOOGLE CLOUD CERTIFICATIONS & CREDENTIALS

Google Cloud Certified — Generative AI Leader
Issued: Nov 2026 • Expires: Nov 2029 • Series ID: 85470 • Credential ID: af92810bd7154c9791ea31c3681d51f7
Partner Specialist: Gemini Enterprise Agent Development & Gemini Enterprise Deployment (Google Cloud)

EDUCATION

Bachelor of Science in Information Systems — Universidade Santa Cecília (UNISANTA) **07/2023 – 06/2027**

TECHNICAL SKILLS

Generative AI & Agents: Google ADK (Agent Development Kit), Google Cloud Agent Platform (Vertex AI), Gemini Enterprise (Agentspace), MCP (Model Context Protocol), LLMs, RAG (Retrieval-Augmented Generation), Prompt Engineering, Multi-Agent Systems.

Languages & Web Development: Python, SQL, TypeScript, HTML5, CSS3.

Google Cloud Platform (GCP) & Tools: Cloud Run, Cloud Scheduler, BigQuery, Secret Manager, REST API Integration, Git, GitHub.

Spoken Languages: Portuguese (Native), English (Advanced — technical reading, writing, and bilingual communication).
